

# **Regina Mandolin Orchestra Website**

ENSE 271 - Mandolins

## **Project Team Members:**

1. Ramanpreet Singh
2. Sebastian Lopez Melendrez
3. Cameron Oehler

## **Project Background & Opportunity:**

The RMO (Regina Mandolin Orchestra) is a Regina-based, non-profit orchestra. Currently, their online member portal is mainly used to share a calendar and governance documents. The RMO has asked for their member portal to be redesigned and improved to make it easier to navigate and more functional for its members. Since the RMO members vary in age and tech skills, the website needs to be intuitive and easy to understand.

## **Northstar & Carryover Customers:**

The Northstar customer for this project is the Conductor and Section Leads of the RMO. These people need to be able to communicate with other members and distribute material easily. The carryover customers will be the students and members of the RMO. These students and members may not directly need some of the administrative and communication tools of the Northstar customer, but will still benefit from the improved communication tools.

## **Project Assumptions:**

- New site designed with WordPress
- Focus on member only section of the site

## **Project Constraints:**

- Easy to navigate
- Mobile and tablet friendly
- User account control
